

C31034

2-inch, End Window PMT ideal
for Photon Counting Applications

Legendary
Performance.

Unsurpassed
Detection.

Look to BURLE when you need the best performance from your photon counting instruments. BURLE's original C31034 Series Photomultiplier offers the best of both worlds; the highest detected quantum efficiency and **dark counts less than 12 cps**, the best available today.

The C31034 Series is ideal for Raman, fluorescence spectroscopy and astronomy. Select the performance characteristics that meet your requirements from a range of tubes within the series.

Call BURLE at 1-800-366-2875 for additional information and ordering. Or, visit www.burle.com.
